1 about us

Polifolia is a leader among European manufacturers of disposable packaging for the food industry.

Over 20 years of experience has helped us in building an invaluable knowledge base and a strong position in an extremely demanding and fast-paced market. Our products' portfolio includes cups, lids, trays and film.

Our clients include production plants, distributors and food packaging producers in Poland, as well France, Germany, Lithuania, Latvia, Estonia, Finland, Ukraine, Belarus, Russia, Czechia, UK, Greece, Moldova, Romania, Slovakia and Hungary.

Our products are used across a wide range of industries and have a variety of uses:

- dairy
- ice cream
- candy floss & popcorn
- meat & poultry
- fish
- beer
- dips
- fruit & vegetables
- pre-prepared meals

2 film

Polifolia offers the highest quality films designed with both food, and non-food packaging industries in mind.

We manufacture three types of film: Polypropylene (PP), Polypropylene EVOH and Polystyrene (PS).

Designed for packing different type of foods, all Polifolia's films have two characteristics in common:

1. retain high plasticity and mechanical resistance,
2. meet the conditions of advanced production and storage processes.

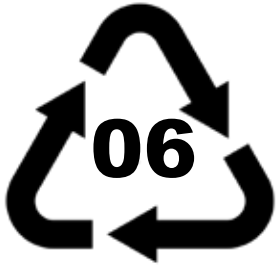
PP or PS?

polypropylene (PP)

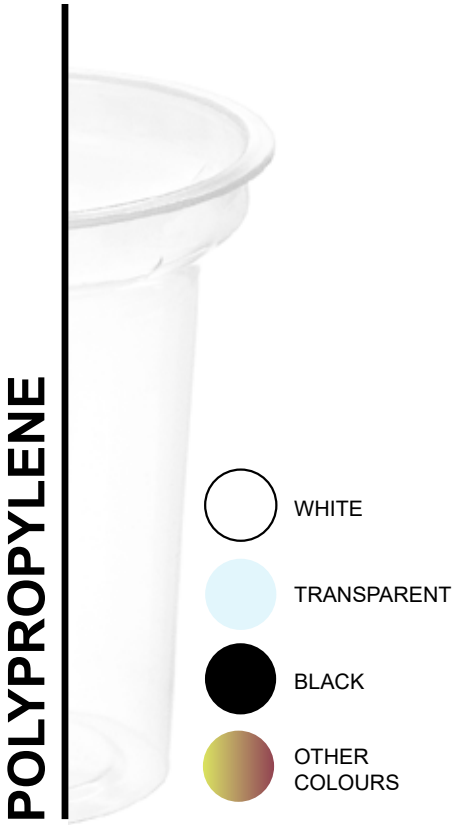
- Most commonly used plastic
- Highly flexible, easy to process material
- Has the lowest density of all polymers used
- Shows very high chemical resistance at room temperature
- PP decomposition is ecological – it does not create waste and/or hazardous gases
- Enables safe storage of foods containing high-fat levels

polystyrene (PS)

- High gloss finish
- Hard and brittle, with limited flexibility and high dimensional stability
- Larger temperature bracket when it comes to forming
- Less shrinkage in comparison with PP
- Enables gas exchange, creating a less effective barrier than PP
- Not suitable for storing high-fat products

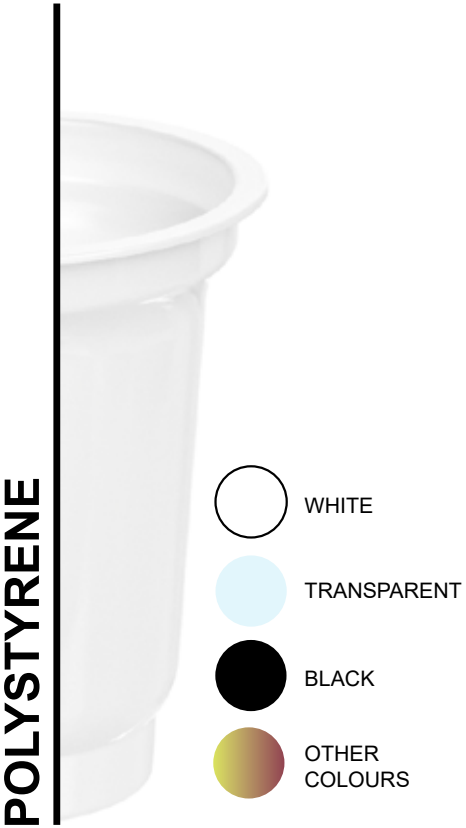


POLYPROPYLENE



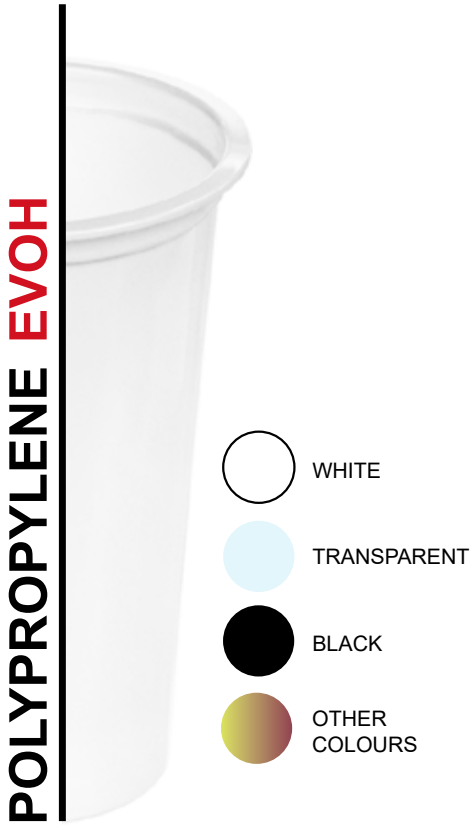
Standard Dimensions*	0,3 – 0,5 mm → width 440 – 500 mm > 0,5 mm – 2,0 mm → 440 – 850 mm
Colours available	white, black and transparent films in continous production, other colours available on request
Options	sealable layer

POLYSTYRENE



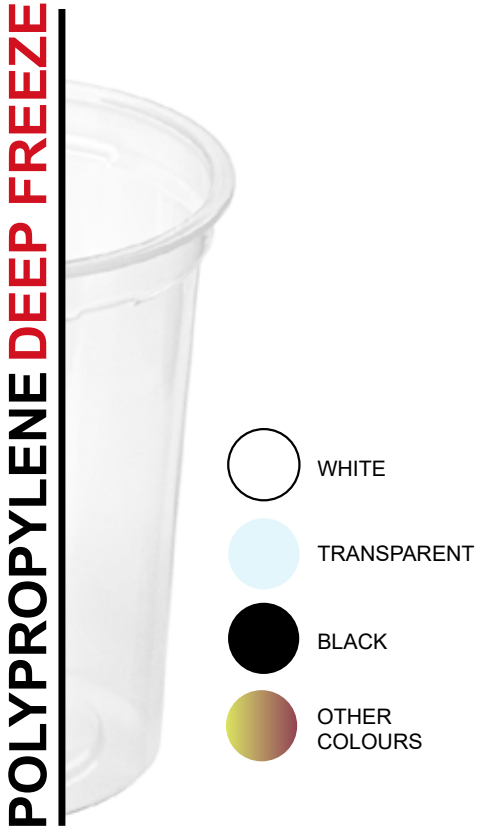
Standard Dimensions*	0,2 – 0,4 mm → width 400 – 650 mm > 0,5 mm – 2,0 mm → 400 – 1000 mm
Colours available	white film in continous production

POLYPROPYLENE EVOH



Standard Dimensions*	0,8 – 2,0 mm → width 300 – 800 mm
Colours available	white, black and transparent films in continous production, other colours available on request

POLYPROPYLENE DEEP FREEZE



Standard Dimensions*	0,3 – 0,5 mm → width 440 – 500 mm > 0,5 mm – 2,0 mm → 440 – 850 mm
Colours available	white, black and transparent films in continous production, other colours available on request
Options	sealable layer

*other dimensions are available on request

3 labeling techniques

DRY OFFSET PRINT

MAIN BENEFITS

- Great print quality and brightness of colours
- Environment friendly
- Efficient and cost effective
- Perfect for high-volume projects

SHRINK SLEEVE LABELS

MAIN BENEFITS

- 360-degree graphic
- Enhancing the cup's lines
- Can be applied to virtually any shape or size
- Provide an excellent scuff resistance

LABEL

MAIN BENEFITS

- Very durable
- Abrasion resistant
- Great display for product

4

cups: dairy

Polifolia offers a wide range of cups dedicated for dairy products. Our portfolio includes cups made of Polypropylene, as well as, Polystyrene.

Safety & Durability
Our cups are made of the highest quality raw materials. They are food-safe, taste, and odour neutral, and 100% recyclable making them a fantastic dairy packaging option for today's environmentally conscious consumers.

Labelling options available: print (dry offset – 8 colours), label, sleeve.

Additional use:

- Sauces & dips
- Candy floss
- Popcorn
- Snacks
- Deep freeze
- Measuring cup
- Desserts
- Musli
- Noodles
- Pates
- Salads
- Soups

8 trays

Polifolia offers trays made of mono- or multilayer material.

Polypropylene outer layer made out of rigid plastic offers high transparency. It could, however, be coloured to any PANTONE colour. PP layer is rigid and durable, which makes it extremely resistant to any mechanical damages.

The middle layer (eg. EVOH) is characterised by low air and food gases migration.

The sealable layer enables a tight and easy close, which is very important when using trays on machines with high packing efficiency.

Trays dedicated to store meat, paultry and fish are available with the absorbent pads. Pads protect fresh products from dripping and help them look the most attractive.

Example use:

- Cheese
- Deli
- Meat
- Poultry
- Fish
- Ready meals

10 our quality

Our priority is to meet the quality requirements of our customers and guarantee the safety of our products.
This is reflected in the introduction of the Quality Management Systems: BRC-IOP, ISO 22000: 2005, ISO 9001: 2015, CE Certificate

wentworth technologies

best value company

Safety - Security - Sustainability

Wentworth delivers products and services that enhance safety, quality and sustainability. We partner with our customers and world class technology partners to design, manufacture and deliver best value solutions.

Our businesses fall into 2 categories – Plastics Processing and Mold & Tooling.

Plastics Processing

- Designing, manufacturing, delivering packaging and technical product solutions
- Operating 18 manufacturing facilities in Canada, US & Poland to serve the North American & European markets

Mold & Tooling

- Largest independent blow mold supplier worldwide
- Offering tooling for PET Preforms, Blow Molds, Extrusion Blow Molds, Injection Stretch Blow Molds, Injection Blow Molds, Injection Molds, Precision Machining, & Thermoforming

Wentworth Values

CUSTOMER FOCUS

Our customers are the focus of everything we do.

INTEGRITY

We always act with integrity through honesty, fairness and accountability.

PEOPLE

Our employees are the source of our strength – involvement, teamwork and sharing are core values.

CONTINUOUS IMPROVEMENT

Continuous improvement is essential to creating value – it's how we supply the best value.

Best Value Companies

Under the Wentworth banner, 18 independent plastics processing, mold manufacturing, and service facilities operate in Europe and North America under 11 different companies.
