

OUR COMMITMENT TO SUSTAINABILITY

RECYCLE

Our products are
100% recycled & recyclable.
We also process 100% of our
production waste.

REUSE

We return recycled waste to production by adding it to our products.

We do everything we can to **minimize the consumption of virgin raw material.**

03

INVEST

We invest in modern, **energy saving machines.**

05

SLIM DOWN

We slim down our packaging. By doing so, we **help reducing the amount of plastic** placed on the market.

04

CARE

We segregate waste, reduce paper consumption, issue electronic invoices.

An aerial photograph of a town and surrounding fields. In the foreground, there are green fields and some industrial buildings. In the middle ground, there is a town with various houses and buildings. In the background, there are more fields and a distant horizon under a blue sky with some clouds.

1 about us

Amhil is one of the leading independent producers of disposable plastic cups, lids and other plastic packaging used in the food and beverage industry.

Amhil Europa was set up in Poland in December 2001. It started operating as a sister company to Amhil Enterprises, Canada.

In addition to design and production, we offer laser engraving, embossing, dry offset printing and shrink sleeves labelling of our products.

2 SUP markings

As of July the 3rd 2021, the Regulation (EU) 2020/2151 of 17 December 2020 laying down rules on harmonised marking specifications on single-use plastic (SUP) products listed in Part D of the Annex to Directive (EU) 2019/904 of the European Parliament and the Council comes into force.

Directive requires placement of SUP marking on certain disposable plastic items that are often disposed of improperly. This includes single-use beverage cups.

Amhil Europa fully complies with the Single-Use Plastic Directive and therefore, offers a full range of plastic cups marked with the SUP logo.

As a packaging producer, we are also strongly committed to reducing the amount of plastic we introduce to the market. To achieve this objective, we are decreasing the weight of our standard cups to a minimum, while maintaining their structural integrity and physical performance.

*Team
Amhil Europa*

The following sizes of cups: 440ml, 350ml, and 300ml will have the logo applied by embossing.

All other sizes will have markings printed on them. The logo will consist of the pictogram and text written in the official language where the single-use plastic product is placed on the market.

3 cups

Amhil offers a wide range of plastic cups. Our portfolio includes cups made of rPET and PP.

All our rPET families come in two options: Infinity & ECO

Durability

Our cups are made of the highest quality raw materials, therefore, they are resistant to cracks while maintaining excellent clarity. They are ideal for all kinds of outdoor events, festivals and festivities.

Perfect display of your product

Heavy duty high transparency materials used to produce our cups make them perfect for serving your customers still & carbonated drinks, cocktails, smoothies and even desserts!

POLYPROPYLENE

Our offer includes a transparent polypropylene cup, ideal for serving various types of cold drinks.

MAIN FEATURES

- Available volumes: 250, 300, 400 and 500ml
- Half-cup cut improves the handling.
- Custom print options for cups - up to 8 colours

STRONG POINTS

- Incredibly light
- Crack resistant

EUROPEAN

Made of lightweight and durable plastic, the PET EUROPEAN cup is created for serving cold drinks and ice-cream

MAIN FEATURES

- Available volumes: 200, 250, 300, 400 and 500ml
- Step, mark line and CE mark
- Various designs of lids for many applications

STRONG POINTS

- Very durable
- Custom print options for cups - up to 8 colours

Infinity version available
(100% postconsumer rPET)

AMERICAN

AMERICAN cups are made with the heavy duty crystal-clear PET material, which makes them not only perfect for displaying your product, but also extremely resistant to cracks.

MAIN FEATURES

- Available volumes: 150/200, 250, 300, 400 and 500ml
- Strong and durable straight-wall cups
- Crystal clear

STRONG POINTS

- Crack resistant
- Custom print options for cups - up to 8 colours

Infinity version available
(100% postconsumer rPET)

It's PET, just greener!

All our AMERICAN, EUROPEAN and SOUL cups are now ECO! They are made of 45% of rPET.

SOUL

Soul's unique design has been inspired by a traditional glass. It is perfect for serving beer, wine and soft drinks, giving your customers the perception of drinking from a real glass and not a plastic cup.

MAIN FEATURES

- Available volumes: 150/200, 250, 300, 400 and 500ml
- Unique design
- Thick base

STRONG POINTS

- Good substitution for injection moulded glasses
- Narrow rim

Infinity version available
(100% postconsumer rPET)

AMERICAN

SOUL

4 our sustainable solution

At Amhil, we believe in the New Growing Plastic Economy, which is based on the principles of a circular economy.

Our mission is to accelerate the development of innovative solutions and products that will help building the economy of Zero Waste, where plastics are treated as a valuable resource for recycling.

our **infinity** promise

- 1 We use mono raw materials.
- 2 We use 100% post-consumer recycled PET, which preserves it's best attributes: it is clear, durable and 100% food safe.
- 3 We promote a circular economy by refraining from putting new plastic into circulation. Used cups are collected for the production of new glasses.

infinity

- ✓ 100% food safe
- ✓ **100% post-consumer rPET**
- ✓ 100% circular economy
- ✓ No new plastic enters the economy
- ✓ **0g CO₂ emission = climate neutral**

eco

- ✓ 100% food safe
- ✓ **45% recycled rPET (post-industrial & post-consumer)**
- ✓ Environment friendly
- ✓ Cost effective

Very resistant
used for long shelf life products

Quite resistant
used for short shelf life products

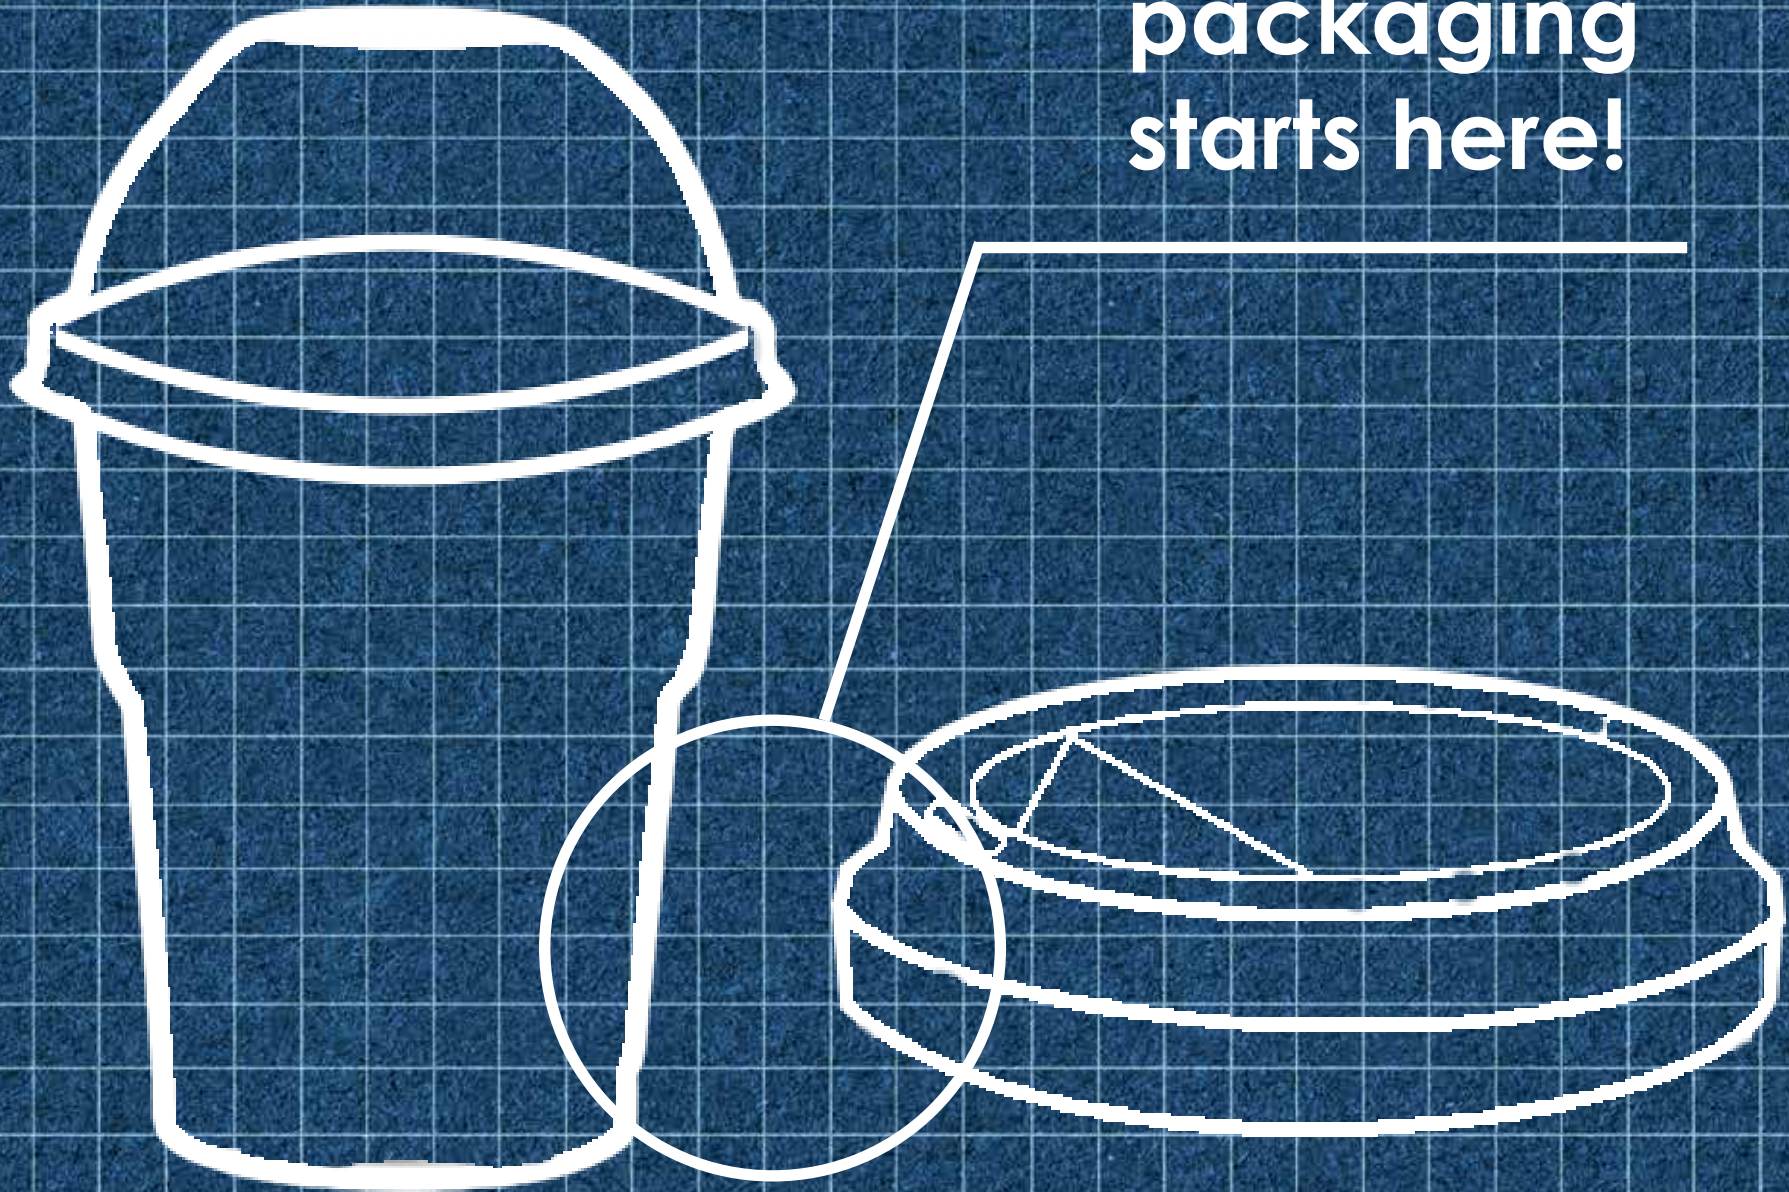

Reduction of Waste

Use of virgin material
- new plastic enters the economy

Reduces plastic waste - uses plastic that would otherwise end up in landfills, oceans, etc.

PLA cannot be recycled properly so it ends up either in landfills or is sent to special composting facilities.

**Your BESPOKE
packaging
starts here!**

because size matters

At Amhil, we know how important it is to have a product that 100% matches your needs. Non-generic lid dimension or cup volume - no problem!

Our project team will work with you to design a product that meets any special requirements.

labeling options

DRY OFFSET PRINT

Dry offset printing is perfect for high-volume projects. It's efficient and cost-effective. It provides great print quality and brightness of colours.

EMBOSSING

Our innovative solution for those who need an elegant cup that would make them stand out. Embossing is a fantastic alternative to traditional printing and it's 100% recyclable!

LASER ENGRAVING

Using a laser causes the material to "foam." It means that the material is not removed from the surface, but it's structure is modified, creating a contrast that the human eye can see as a shade of a colour. We believe laser engraving is the best option for the customers, who change their cups/ graphic frequently. It's also 100% recyclable!

The background of the slide features two clear plastic cups from the brand 'Amhil'. The cup on the left is filled with a brown beverage, topped with white foam and a red straw. The cup on the right is filled with an orange beverage, also topped with white foam and a red straw. Both cups have the 'Amhil' logo printed on them in a light, translucent font. The background is a blurred outdoor setting.

6 lids

Amhil offers a wide range of lids made of 100% recyclable PET and rPET.

The high quality of our products means that they are the perfect match to our standard Polypropylene, European, American and Sole cups, guaranteeing no leaks or spills.

Our portfolio contains a great variety of lids, including flat lids, dome lids with a straw hole, as well as innovative sip through solutions.

In addition, you will find dedicated inlay inserts, which, together with the dome lid, create an ideal solution for presenting desserts with loose toppings, vegetables with spreads and dips, or yogurts with granola.

FLAT lid

MAIN FEATURE

- Great on-the-go solution
- Leak resistant
- One lid fits all PET cups

STRONG POINTS

- Carefully designed and engineered to provide the best fit for your cup or container

Infinity version available
(100% postconsumer rPET)

DOME lid

MAIN FEATURES

- Raised dome for froth or toppings
- Leak resistant seal to reduce spills and splashes

STRONG POINTS

- Carefully designed and engineered to provide the best fit for your cup or container

Infinity version available
(100% postconsumer rPET)

DOUBLE HOLE lid

MAIN FEATURES

- Ideal for fresh vegetables
- Double holes ensure good ventilation

STRONG POINTS

- Carefully designed and engineered to provide the best fit for your cup or container

Infinity version available
(100% postconsumer rPET)

SIP-THRU lid

MAIN FEATURES

- Innovative **STRAWLESS** design
- Perfect replacement for straws
- Made for plastic and paper cups

STRONG POINTS

- Carefully designed and engineered to provide the best fit for your cup or container

Infinity version available
(100% postconsumer rPET)

All of our transparent cups, lids and inlays can be mix and matched with each other.

A woman with long brown hair, wearing a bright red coat over a white shirt, is looking off to the side. She is holding a white coffee cup with a black lid in her right hand and a stack of books in her left arm. The background is a blurred outdoor scene with trees and sunlight.

8 PS lids

The main advantage of lids made of Polystyrene is that, unlike PET lids, they can be used for hot drinks. Depending on customers needs, they can be manufactured in a variety of colors. The most popular, however, are: natural (milky), white and black.

The most common lid diameters are 80 mm and 90 mm, however, our main focus is to produce lids for specific cups or containers, which allows us to eliminate problems with their fitting and thus obtain proper tightness parameters.

The production of bespoke lids means that each customer can place product or company-specific details on each lid, as per their requirements.

9 our quality

We operate in accordance with the following quality systems:

We use the statistical methods of process and quality control provided by the QDA programme.

The quality control of all products is based on over 20-year experience of Canada's Amhil Enterprises. The know-how of the Amhil Enterprises specialists was transferred to our company and expanded with the European standards.

All our products are made of top quality raw materials provided by world leaders of the chemical industry, they are microbiologically tested on a regular basis by accredited laboratories. They are also subject to periodical global migration tests and heavy metal content tests.

polifolia

film

POLYSTYRENE

Thickness	0,2 – 0,4 mm → width 400 – 650 mm > 0,5 mm – 2,0 mm → 400 – 1000 mm
Colours available	White film in continuous production

POLYPROPYLENE

Thickness	0,3 – 0,5 mm → width 440 – 500 mm > 0,5 mm – 2,0 mm → 440 – 850 mm
Colours available	White, black and transparent films in continuous production Other colours available on request
Options	Sealable layer

POLYPROPYLENE EVOH

Thickness	0,8 – 2,0 mm → width 300 – 800 mm
Colours available	White, black and transparent films in continuous production Other colours available on request

POLYPROPYLENE DEEP FREEZE

Thickness	0,3 – 0,5 mm → width 440 – 500 mm > 0,5 mm – 2,0 mm → 440 – 850 mm
Colours available	White, black and transparent films in continuous production, Other colours available on request
Options	Sealable layer

Material	PP
Colours available	black, transparent, white

Safety - Security - Sustainability

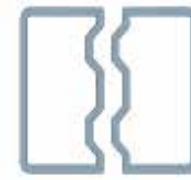

Wentworth delivers products and services that enhance safety, quality and sustainability. We partner with our customers & world class technology partners to design, manufacture and deliver best value solutions.

Our businesses fall into 2 categories – Plastics Processing and Mold & Tooling.

Plastics Processing

- Designing, manufacturing, delivering packaging & technical product solutions
- Operating 18 manufacturing facilities in Canada, US & Poland to serve the North American & European markets

Mold & Tooling

- Largest independent blow mold supplier worldwide
- Offering tooling for PET Preforms, Blow Molds, Extrusion Blow Molds, Injection Stretch Blow Molds, Injection Blow Molds, Injection Molds, Precision Machining, & Thermoforming

Wentworth Values

CUSTOMER FOCUS

Our customers are the focus of everything we do.

INTEGRITY

We always act with integrity through honesty, fairness and accountability.

PEOPLE

Our employees are the source of our strength – involvement, teamwork & sharing are core values.

CONTINUOUS IMPROVEMENT

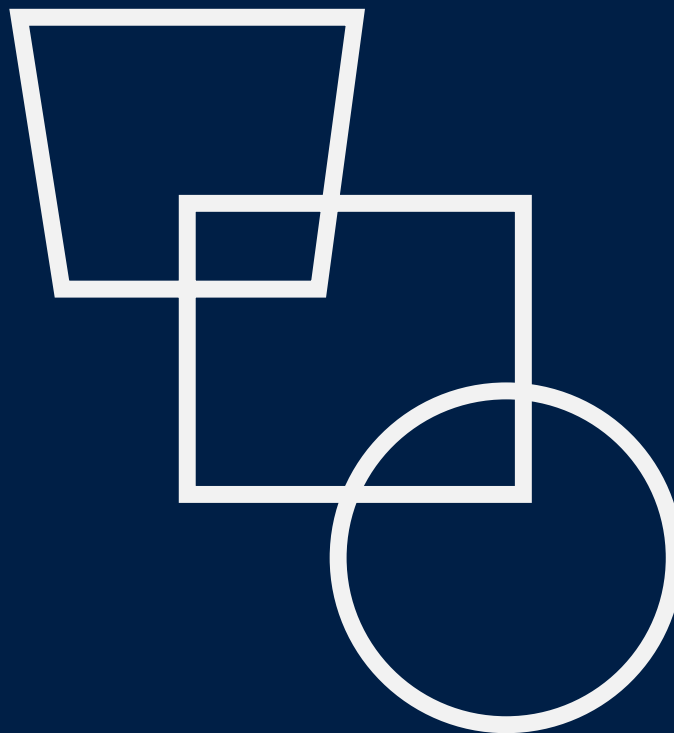

Continuous improvement is essential to creating value – it's how we supply the best value.

Best Value Companies

Under the Wentworth banner, 18 independent plastics processing, mold manufacturing, and service facilities operate in Europe and North America under 11 different companies.
